

Lucas Borges da Silva

Back-end Developer | Ruby on Rails | PHP

São Lourenço do Sul, RS, Brazil • lucas18sborges@gmail.com • github.com/Lusqinha • linkedin.com/in/lucas-borges-da-silva-rs

PROFESSIONAL SUMMARY

Back-end Developer with experience in Ruby on Rails and PHP/Laravel, working on the development of ERP systems, REST APIs, e-commerce platforms and financial modules. Track record of delivery on foreign trade (COMEX), CRM and billing projects in production environments. Solid knowledge of PostgreSQL, MySQL, Redis, Sidekiq and test-driven development with RSpec and TDD.

TECHNICAL SKILLS

Ruby • Ruby on Rails • PHP • Laravel • PostgreSQL • MySQL • Redis • Sidekiq • RSpec • TDD • REST APIs • MVC Architecture • ActiveRecord • Git • GitHub • Claude Code • LLMs • AI Agents • AI-First Development

PROFESSIONAL EXPERIENCE

Zimobi | Full Stack Developer

September 2026 – Present • Remote

- Maintain and evolve the platform, fixing bugs and handling customer support tickets in production, ensuring stability and fast incident response.
- Contribute to the development of new features, focused on WhatsApp chatbot functionality.
- Maintain and build integrations with third-party systems (ERP/CRM) and internal tools that extend and automate customer communication flows.

Mainô | Back-end Developer

February 2025 – June 2026 • Remote

- Developed integrations with external APIs for the COMEX (foreign trade) module, connecting the ERP to customs systems and logistics partners via REST.
- Implemented and maintained an internal billing and financial management system, covering the invoicing flow, delinquency control and automated dunning workflows.
- Developed CRM module features and refactored legacy code with SQL query optimization, reducing technical debt.
- Adopted an AI-first workflow with Claude Code and supported the development of AI agents and internal automations integrated with the ERP, accelerating delivery and reducing manual work.

Prática Certificação Digital LTDA | Customer Support Agent

September 2023 – August 2024 • Pelotas, RS

- Provided specialized technical support for the issuance and renewal of A1 and A3 digital certificates, serving both individual and corporate customers.
- Troubleshoot technical issues related to public key infrastructure (PKI) and certificate configuration across operating systems and browsers.

PROJECTS

D'ultimahora | Ticket Resale Marketplace

December 2024 – Present • São Lourenço do Sul, RS

- Co-founded and lead the development of a ticket resale marketplace built with Ruby on Rails, connecting sellers and buyers on a peer-to-peer platform.
- Designed and implemented the system architecture, including listing management, transaction flow and user control.
- Integrated an LLM into the listing publication flow for automated content moderation and fraud screening, flagging suspicious listings before manual review.

EDUCATION

PUC-RS | Associate Degree in Systems Analysis and Development

October 2023 – June 2026
